Section 2 • Hazards Identification						

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all the information required by the Controlled Products Regulations.

Emergency Overview:

Aerosol: DANGER: Extremely flammable. Contents under pressure. Harmful or fatal if swallowed.

- Bulk: DANGER: Extremely flammable. Harmful or fatal if swallowed.
- Primary route(s) of entry: Skin and eye contact. Inhalation.

Potential Acute Health Effects:

Eyes:	Irritating to eyes.
Skin:	Repeated exposure may cause skin dryness or cracking.
Inhalation:	Excessive inhalation of vapors can cause irritation of the respiratory tract, nausea, dizziness or headache.
Ingestion:	Product has a low order of acute oral toxicity, but ingestion of large quantities may cause nausea, vomiting, and gastrointestinal irritation. May cause injury if aspirated into lungs.

Medical conditions aggravated by exposure:

Persons with pre-existing central nervous system (CNS) disease, neurological conditions, skin disorders, chronic respiratory diseases, or impaired liver or kidney function should avoid exposure.

Signs and Symptoms

Stinging in eyes. Repeated or prolonged skin contact can cause redness, irritation, and scaling of the skin (dermatitis). Breathing of high vapor concentrations may cause headaches, stupor, irritation of throat and eyes, and kidney effects.

		Secti	on 5 • Fire Fighting Mea	isures		
Products of Co	mbustion:	Carbon monoxide	and carbon dioxide.			
General Fire Hazards:			Do not use on energized equipment. High heat will cause product to boil, evolving vapor that could cause explosiv rupture of closed containers.			
Firefighting media: SMALL FIRE: Use DRY chemical powder. LARGE FIRE: Use CO2, water spray, fog or foam. Cool containing pressure build-up, auto-ignition or explosions.			 Cool containing vessels 	s with v	vater jet in order to prevent	
Sensitivity to Ir	npact:	None	Sensitivity to Static Disc	harge: Yes		
Protection Clothing (Fire): Firefighters must use full bunker gear including NIOSH-approved positive pressure self-or apparatus to protect against potential hazardous combustion or decomposition products a Evacuate area and fight the fire from a maximum distance or use unmanned hose holder				oducts and oxygen deficiencies.		
•	(s on Explosion Haz (plode upon heating, s	ards: pread fire and overcome sp	prinkler systems.			
		Section	6 • Accidental Release I	Measures		

Containment Procedures:	Small Spill and Leak:	Eliminate ignition sources. Absorb with an inert material and dispose of properly.			
	Large Spill and Leak:	Eliminate ignition sources. Secure the area and control access. Dike far ahead of a liquid spill to ensure complete collection. Pick up free liquid for disposal using absorbent pads, sand, or other inert non-combustible absorbent materials. Place into appropriate waste containers for later disposal.			
Clean-Up Procedures:	Recover free product an	d place in a suitable container for disposal.			
Evacuation Procedures:	Ventilate area of leak or	spill. Keep unnecessary and unprotected people away.			
Special Procedures:	Remove all sources of ig	nition. Ventilate area. Wear personal protective equipment during cleanup.			

Revision Date:	August 3, 2011	Supersedes:	August 24, 2010

Section 7 • Handling and Storage

Handling:	DO NOT spray into or around ignition sources. After handling, always wash hands thoroughly with soap and water. Use only with adequate ventilation. Avoid breathing vapors or spray mists.

Storage: Keep container closed and in a cool, well-ventilated area. Avoid all sources of ignition (spark or flame). Store below 120°F (49°C).

Precautions to be taken in handling and storage:

Store aerosols as Level 3 Aerosol (NFPA 30B). Store bulk liquids as NFPA Class 1B liquid. Store all materials in a dry, well-ventilated area. Avoid breathing vapors. Ground and bond containers before transferring materials.

Section 8 • Exposure Controls / Personal Protection

Exposure Guidelines:

Component	CASRN	OSHA	ACGIH	NIOSH	Supplier
2-Methylpentane	107-83-5	Not established	Not established	100 ppm TWA	500 ppm TLV 1000 ppm STEL
3-Methylpentane	96-14-0	Not established	Not established	100 ppm TWA	500 ppm TLV 1000 ppm STEL
2,3-Dimethylbutane	79-29-8	Not established	Not established	100 ppm TWA	500 ppm TLV 1000 ppm STEL
Isopropanol	67-63-0	400 ppm PEL	200 ppm TLV 400 ppm STEL	400 ppm TWA 500 ppm STEL	400 ppm TWA
2,2-Dimethylbutane	75-83-2	Not established	Not established	100 ppm TWA	500 ppm TLV 1000 ppm STEL
Carbon Dioxide (aerosol only)	124-38-9	5000 ppm PEL	5000 ppm TLV 30000 ppm STEL	5000 ppm TWA 30000 ppm STEL	None reported
n-Hexane	110-54-3	500 ppm PEL	50 ppm TLV	50 ppm TWA	None reported

Engineering Controls: Provide general and/or local exhaust ventilation to keep exposures below the exposure guidelines listed above.

Personal protective equipment

Eye protection:	Safety glasses with side shields conforming to appropriate regulations. Eye wash fountain and emergency shower facilities are recommended.
Hand protection:	Normally no hand protection is required; however, if product will be sprayed for an extended period, "overspray" onto skin may occur. If so, wear chemical resistant gloves conforming to appropriate regulations. Please observe the instructions regarding permeability and breakthrough time that are provided by the supplier of the gloves.
Respiratory protection:	Typical use of this product under normal conditions does not require the use of respiratory protection. If airborne concentrations are above the applicable exposure limits (listed above), use NIOSH approved respiratory protection (i.e. organic vapor cartridge).
General Hygiene Considerations:	Wash thoroughly after handling. Have eye-wash facilities immediately available.
