According to EC No 1907/2006 as amended as at the date of this SDS

AeroShell Grease 58

Version	Revision Date:	SDS Number:	Date of last issue: 06.03.2024
4.2	26.07.2024	800001028622	Print Date 27.07.2024

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name	: AeroShell Grease 58
Product code	: 001E8492
Unique Formula Identifier (UFI)	: R5R0-001P-J00F-PRXY
(011)	

1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Sub-	: Synthetic grease for aircraft., For further details consult the
stance/Mixture	AeroShell Book on www.shell.com/aviation.
Uses advised against	: This product must be used, handled, and applied in accord- ance with the requirements of the equipment manufacturer's manuals, bulletins and other documentation. This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the sup- plier.

1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier	: Shell UK Oil Products Limited Shell Centre London SE1 7NA United Kingdom
Telephone Telefax Contact for Safety Data Sheet	 : (+44) 08007318888 : : If you have any enquiries about the content of this SDS please email lubricantSDS@shell.com

1.4 Emergency telephone number

: +44 (0) 20 7934 7778 (This telephone number is available 24 hours per day, 7 days per week)

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Skin sensitisation, Category 1

H317: May cause an allergic skin reaction.

According to EC No 1907/2006 as amended as at the date of this SDS

AeroShell Grease 58

Version 4.2	Revision Date: 26.07.2024	SDS Number: 800001028622	Date of last issue: 06.03.2024 Print Date 27.07.2024
Serio	us eye damage, Categ	ory 1 H3	18: Causes serious eye damage.

Haza	rdous components whi	ch must be listed on	the label:
	ains alkyl thiadiazole. ains Lithium Calcium B	orated Complex.	

Contains Lithium Calcium Borated Complex. Sensitising components : Contains mercaptothiadiazole derivative.

May produce an allergic reaction.

2.3 Other hazards

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

According to EC No 1907/2006 as amended as at the date of this SDS

AeroShell Grease 58

Version	Revision Date:	SDS Number:	Date of last issue: 06.03.2024
4.2	26.07.2024	800001028622	Print Date 27.07.2024

Ecological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Toxicological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

Used oil may contain harmful impurities.

High-pressure injection under the skin may cause serious damage including local necrosis. Not classified as flammable but will burn.

SECTION 3: Composition/information on ingredients

3.2 Mixtures

Chemical nature

: Blend of polyolefins and additives.

Chemical name	CAS-No. EC-No. Index-No. Registration number	Classification	Concentration (% w/w)
Polyalkylated naphthalene	Not Assigned	Aquatic Chronic 4; H413	5 - 10
Reaction products of boric acid and calcium dihydroxide and lithi- um hydroxide	Not Assigned 701-453-3 01-2120772308-49	Acute Tox. 4; H302 Eye Dam. 1; H318 Repr. 2; H361d specific concentration limit Repr. 2; H361d 7.8 %	3 - 6
Amine phosphate	68603-55-4 271-663-3 01-2119493620-38	Skin Irrit. 2; H315 Aquatic Acute 1; H400 Aquatic Chronic 3; H412	1 - 3
Alkaryl amine	68411-46-1 270-128-1 01-2119491299-23	Repr. 2; H361f	1 - 2.9
Alkyl thiadiazole	Not Assigned 948-020-7 01-2120792779-28	Skin Irrit. 2; H315 Skin Sens. 1A; H317 Acute Tox. 4; H332 Aquatic Chronic 4; H413	0.1 - 0.9
Mercaptothiadiazole derivative	72676-55-2 276-763-0	Skin Sens. 1; H317 Aquatic Chronic 2;	0.1 - 0.9

Components

According to EC No 1907/2006 as amended as at the date of this SDS

For explanation of abbreviations see section 16.

SECTION 4: First aid measures

4.1 Description of first aid measures

Protection of first-aiders :	When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.
If inhaled :	No treatment necessary under normal conditions of use. If symptoms persist, obtain medical advice.
In case of skin contact :	Remove contaminated clothing. Flush exposed area with wa- ter and follow by washing with soap if available. If persistent irritation occurs, obtain medical attention.
	When using high pressure equipment, injection of product under the skin can occur. If high pressure injuries occur, the casualty should be sent immediately to a hospital. Do not wait for symptoms to develop. Obtain medical attention even in the absence of apparent wounds.
In case of eye contact :	Immediately flush eye(s) with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. Transport to the nearest medical facility for additional treat- ment.
If swallowed :	In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.

According to EC No 1907/2006 as amended as at the date of this SDS

AeroShell Grease 58

Version 4.2	Revision Date: 26.07.2024	SDS Number: 800001028622	Date of last issue: 06.03.2024 Print Date 27.07.2024

SECTION 5: Firefighting measures

5.1 Extinguishing media Suitable extinguishing media :		:	Foam, water spray or fog. Dry chemical powder, carbon diox- ide, sand or earth may be used for small fires only.
	Unsuitable extinguishing media	:	Do not use water in a jet.
5.2	Special hazards arising from	the	substance or mixture
	Specific hazards during fire- fighting	:	Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide may be evolved if incomplete combustion occurs. Unidentified organic and inorganic compounds.
5.3	Advice for firefighters		
	Special protective equipment for firefighters	:	Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).

According to EC No 1907/2006 as amended as at the date of this SDS

Er	vironmental precautions	Prevent from spr	containment to prevent uncontrolled release. eading or entering drains, ditches or rivers by , or other appropriate barriers.
6.3 Me	hods and material for co	ntainment and cleani	ng up

Methods for cleaning up	:	Shovel into a suitable clearly marked container for disposal or
		reclamation in accordance with local regulations.

6.4 Reference to other sections

For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet., For guidance on disposal of spilled material see Section 13 of this Safety Data Sheet.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Technical measures	:	Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols. Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.
Advice on safe handling	:	Avoid prolonged or repeated contact with skin. Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper handling equipment should be used. Properly dispose of any contaminated rags or cleaning mate- rials in order to prevent fires.
Hygiene measures	:	Exposure to this product should be reduced as low as reason- ably practicable. Reference should be made to the Health and Safety Executive's publication "COSHH Essentials".

7.2 Conditions for safe storage, including any incompatibilities

According to EC No 1907/2006 as amended as at the date of this SDS

AeroShell Grease 58

Version 4.2	Revision Date: 26.07.2024	SDS Number: 800001028622	Date of last issue: 06.03.2024 Print Date 27.07.2024

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Biological occupational exposure limits

No biological limit allocated.

8.2 Exposure controls

Engineering measures

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

General Information:

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or subsequent recycle.

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

According to EC No 1907/2006 as amended as at the date of this SDS

AeroShell Grease 58

Version	Revision Date:	SDS Number:	Date of last issue: 06.03.2024
4.2	26.07.2024	800001028622	Print Date 27.07.2024

Due to the product's semi-solid consistency, generation of mists and dusts is unlikely to occur.

Personal protective equipment

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Eye protection	Wear goggles for use against liquids and gas, combined with face shield. Approved to EU Standard EN166. Wear full face shield if splashes are likely to occur. If a local risk assessment deems it so then chemical splash goggles may not be required and safety glasses may provide adequate eye protection.
Hand protection	
Remarks	Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended. For continuous contact we recommend gloves with break-through time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model.
Skin and body protection	Wear chemical resistant gloves/gauntlets and boots. Where risk of splashing, also wear an apron. Protective clothing approved to EU Standard EN14605.
Respiratory protection	No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material.

According to EC No 1907/2006 as amended as at the date of this SDS

SECTION 13: Disposal considerations

13.1	Waste treatment methods		
	Product :		Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal meth- ods in compliance with applicable regulations. Do not dispose into the environment, in drains or in water courses.
			Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment. Waste, spills or used product is dangerous waste. Waste arising from a spillage or tank cleaning should be dis- posed of in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand. Do not dispose of tank water bottoms by allowing them to drain into the ground. This will result in soil and groundwater contamination.
			MARPOL - see International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) which provides technical aspects at controlling pollutions from ships.
	Contaminated packaging :	:	Dispose in accordance with prevailing regulations, preferably to a recognized collector or contractor. The competence of the collector or contractor should be established beforehand. Disposal should be in accordance with applicable regional, national, and local laws and regulations.
	Local legislation		
	Waste catalogue	:	EU Waste Disposal Code (EWC):
	Waste Code	:	12 01 12*
	Remarks	:	Disposal should be in accordance with applicable regional, national, and local laws and regulations. Classification of waste is always the responsibility of the end

Exposure Scenario - Worker 30000000170

SECTION 1	EXPOSURE SCENARIO TITLE	
Title	General use of lubricants and greases in vehicles or machin- ery Industrial	
Use Descriptor	Sector of Use: SU3 Process Categories: PROC1, PROC2, PROC8b, PROC9 Environmental Release Categories: ERC4, ERC7, ATIEL- ATC SPERC 4.Bi.v1	
Scope of process	Covers general use of lubricants and greases in vehicles or machinery in closed systems. Includes filling and draining of containers and operation of enclosed machinery (including engines) and associated maintenance and storage activities.	

٦

SECTION 2	OPERATIONAL CONDITIONS AND RISK MANAGEMENT MEASURES		
Additional Information	No exposure assessment presented for the environment.		
Section 2.1	Control of Worker Exposure		
Product Characteristics			
Physical form of product	Liquid, vapour pressure < 0.5 kPa at STP		
Concentration of the Sub-	Covers use of substance/product up to 100% (unless stated		
stance in Mixture/Article	differently).,		
Frequency and Duration of	Use		
Covers daily exposures up to	o 8 hours (unless stated differently).		

Other Operational Conditions affecting Exposure

Assumes use at not more than 20°C above ambient temperature (unless stated differently). Assumes a good basic standard of occupational hygiene is implemented.

Contributing Scenarios	Risk Management Measures
General measures applicable to all activities.	Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamina- tion/spills as soon as they occur. Wash off any skin contami- nation immediately. Provide basic employee training to pre- vent / minimise exposures and to report any skin problems that may develop. Use suitable eye protection. Avoid direct eye contact with product, also via contamination on hands.
General exposures (closed systems)Use in closed pro- cess, no likelihood of expo- sure	No other specific measures identified.
Initial factory fill of equip-	No other specific measures identified.

Version	Revision Date:	SDS Number:	Date of last issue: 06.03.2024
4.2	26.07.2024	800001028622	Print Date 27.07.2024

The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

Section 3.2 - Environment

No exposure assessment presented for the environment.

SECTION 4

GUIDANCE TO CHECK COMPLIANCE WITH THE EXPOSURE SCENARIO

Section 4.1 - Health

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

Section 4.2 - Environment

No exposure assessment presented for the environment.

According to EC No 1907/2006 as amended as at the date of this SDS

Exposure Scenario - Worker

SECTION 1	EXPOSURE SCENARIO TITLE		
Title	Use of lubricants and greases in open systems Profession		
Use Descriptor	Sector of Use: SU22 Process Categories: PROC1, PROC2, PROC8a, PROC10, PROC11, PROC13 Environmental Release Categories: ERC8a, ERC8d, ATIEL-ATC SPERC 8.Cp.v1		
Scope of process	Covers use of lubricants and greases in open systems, in- cluding application of lubricant to work pieces or equipment by dipping, brushing or spraying (without exposure to heat), e.g. mould releases, corrosion protection, slideways. Includes associated product storage, material transfers, sampling and maintenance activities.		
SECTION 2	OPERATIONAL CONDITIONS AND RISK MANAGEMEN		

٦

	MEASURES	
Additional Information	No exposure assessment presented for the environment.	
Section 2.1	Control of Worker Exposure	
Product Characteristics		
Physical form of product	Liquid, vapour pressure < 0.5 kPa at STP	
Concentration of the Sub-	Covers use of substance/product up to 100% (unless stated	
stance in Mixture/Article	differently).,	
Frequency and Duration of Use		

Covers daily exposures up to 8 hours (unless stated differently).

Other Operational Conditions affecting Exposure

Assumes use at not more than 20°C above ambient temperature (unless stated differently). Assumes a good basic standard of occupational hygiene is implemented.

Contributing Scenarios	Risk Management Measures
General measures applica-	Avoid direct skin contact with product. Identify potential areas
ble to all activities.	for indirect skin contact. Wear gloves (tested to EN374) if
	hand contact with substance likely. Clean up contamina-
	tion/spills as soon as they occur. Wash off any skin contami-
	nation immediately. Provide basic employee training to pre-
	vent / minimise exposures and to report any skin problems
	that may develop.
	Other skin protection measures such as impervious suits and
	face shields may be required during high dispersion activities
	which are likely to lead to substantial aerosol release, e.g.
	spraying.
	Use suitable eye protection.
	Avoid direct eye contact with product, also via contamination
	on hands.

Material transfersManual- Transfer of substance or preparation (charging/ dis- charging) from/ to vessels/ large containers at non- dedicated facilities	Avoid carrying out activities involving exposure for more than 1 hour.			
Roller, spreader, flow appli- cationRoller application or brushing	Provide a good standard of general ventilation. Natural venti- lation is from doors, windows etc. Controlled ventilation means air is supplied or removed by a powered fan. Avoid carrying out activities involving exposure for more than 4 hours Wear chemically resistant gloves (tested to EN374) in combi- nation with specific activity training.			
SprayingNon industrial spraying	Provide a good standard of general ventilation. Natural venti- lation is from doors, windows etc. Controlled ventilation means air is supplied or removed by a powered fan. Avoid carrying out activities involving exposure for more than 1 hour. Wear a respirator conforming to EN140 with Type A/P2 filter or better. Wear suitable coveralls to prevent exposure to the skin. Wear chemically resistant gloves (tested to EN374) in combi- nation with specific activity training.			
Treatment by dipping and pouringTreatment of arti- cles by dipping and pouring	Provide a good standard of general ventilation. Natural venti- lation is from doors, windows etc. Controlled ventilation means air is supplied or removed by a powered fan.			
Equipment cleaning and maintenanceTransfer of substance or preparation (charging/ discharging) from/ to vessels/ large con- tainers at non-dedicated facilities	Drain down system prior to equipment opening or mainte- nance. Provide a good standard of general ventilation. Natural venti- lation is from doors, windows etc. Controlled ventilation means air is supplied or removed by a powered fan. Avoid carrying out activities involving exposure for more than 4 hours Retain drain downs in sealed storage pending disposal or for subsequent recycle.			
Storage.Use in closed pro- cess, no likelihood of expo-	Store substance within a closed system.			
sureUse in closed, continu- ous process with occasion- al controlled exposure Section 2.2	Control of Environmental Exposure			

 SECTION 3
 EXPOSURE ESTIMATION

 Section 3.1 - Health
 The Risk Management Measures/Operational Conditions that are identified in the Exposure Scenario are the outcome of a quantitative and qualitative assessment that covers this
